Release : TPOne Installer Giveaway  
Publication : HVP – www.hvpmag.co.uk  
Issue : May 2016

### TPOne and only

Published: 12 May, 2016

Simplify your heating control with one of 10 TPOne thermostats up for grabs with Danfoss and HVP!

Danfoss is making intelligent heating control even easier with the launch of the new TPOne Programmable Room Thermostat, which is packed with user-friendly innovations. Designed to suit almost any domestic heating control application, the TPOne delivers all the functionality of the existing TP models in one all-new range, including seven-day programming and timing for a hot water cylinder.

TPOne combines an intuitive user interface with fast installation, thanks to familiar wiring, a setup wizard and installer-specific setting menus.

Among its features is the new quick access Scenario interface. This function provides the flexibility to make a temporary change to the pre-programmed schedule to save energy or deliver increased comfort.

Danfoss TPOne, an ErP class IV product, features two new heating startup options to reduce energy consumption. In addition to the default Standard startup for instant heat at the scheduled time, users can select a Delayed or Optimised start.

Both adjust dynamically according to the difference between the ambient and set temperature, either delaying startup or calculating the optimum time to start heating to hit setpoint at the scheduled time.

#### How to enter

To be in with a chance of winning one of 10 Danfoss TPOne programmable room thermostats, print off this entry form, fill in your details and post it back to us for free to this address:

HVP/Danfoss Competition

32 Vauxhall Bridge Road

London SW1V 2SS

Alternatively, you can enter the competition via email by copying and pasting the entry form and emailing your completed answer to [hvpmag@mail.hgluk.net](mailto:hvpmag@mail.hgluk.net). The closing date for entries is 7 June, 2016.

**Q. What ErP Class rating does the Danfoss TPOne carry?**
